

Visit Anja Brassler to Nepal 17122014 - 08012015

DIPENDRA SCHOOL

Anja said that she saw bit changes in school. After the experiments on couples of children and group art practice, she found the behavior and personality of children has changed in compare with past days. After all she advised to focus more in long term relationship with the parents of children by which teacher will be able to guide their children in more practical way. She was not so pleased with hygienic situation in school and advised school to aware with it by providing more practical lesson of hygiene to the children.

SARASWATI HOME

Anja found home-mother Durga most of the time working in kitchen. The reason is the lack of cook mother who particularly handles kitchen work. Anja said that Saraswati doesn't deserve the position of cook mother and she is not good in managing and controlling children. But she deserves the task like collecting and arranging stuffs, combing hair of children, singing and dancing etc. After the experiments on couples of children like Ashman and Biraj she found some problems in them and advised what is good for them.

About Biraj, Anja said that he is not concentrating, not developing and slow in understanding. He is unknown with particular colors. He himself feels that he doesn't belong to the common group of children and always separated by others. He demonstrated his interest in tools and machine. He was concentrating more in that particular stuff. Anja insured that Biraj may be suffering with autism (*Autism* is known as a complex developmental disability) and he needs additional care and medical treatment.

About Ashman, Anja said that he is suffering with Down syndrome. But is clever and feels the emotions of people. He is not self-controlled in his eating. His regular check up is important and Ashram must careful with his eating.

DUHABI HOME

Anja said that Deepa is recovering than before and advised her to divert in cooking, housekeeping, gardening, swimming etc.

Anja found couple of weak girls not self assured, who are appearing on SLC (School Leaving Certificate) examination next time. They were not focused and very difficult to find what they exactly need. They were very scared about their result of upcoming SLC examination, which they haven't appeared. Anja advised home to apply the additional methods of teaching to improve the quality of education.

Anja saw Sita and Sapana cleaning the kitchen room and building. In this issue, home responded that they are senior children and they should learn to be practical. It is very important for them after their reestablishment in society.

SHC is concerned with the report collected by Anja and very much pleased with her work. We will try to implement her advices to the different projects depending on our available amenities.
