

A Message of Parvat Sanjel,

The Dipendra School is currently in quite complicated state and to establish sound management within School has become a big challenge.

Unexpected and irresponsible leaving of Mrs. Gelal has affected the whole management of School. On the other side, because of collapsed (open) wall, children and adults from surroundings are easily entering School in off school days and creating unsafe environment.

Moreover, School is currently facing plenty of following problems;

- Need a repairing of broken windows and doors
- Need a repairing of electricity and light
- Need to pay a long outstanding bill of water and electricity
- Need to enhance the overall hygienic situation
- Need to facilitate of water adequacy
- Need to improve the standard of education
- Need to fulfill the additional requirement of teachers and coach

Within above problems and challenging situation, I am standing now, but I am quite confident that there is of course a solution of each problem as well as possibilities. Hence, I believe, according to my understanding, I can stand on and able to fight with the challenging situation in School.

However, I don't say that I am 100% perfect, but at least, I will try my best to solve common problems, and insures to take school to the path of development.

I have presented some important points (planning) regarding the development of School and it will be implemented successively.

Administration

The most important body of School is administration. Proper and active administration always helps to develop School. Dipendra School needs an absolute transformation of administration which I have figured out as a core plan.

Relation with parents

Now days, the parents of children have very low attendance in School and are not much concerning in School's activities. That's why the timely parents meet program has almost stopped in School. Since this is a community School and its development is not possible without the participation of parents and community.

I have clearly understood it and will be following it by conducting regular monthly parents meeting.

Children's data collection

School is unknown about the actual condition of a large amount of children. School doesn't have any detail record of children which can be very important motivational information to the donor parties.

Thus according to the plan, we are in next step collecting a maximum data of children by visiting their houses. Like; house condition, family condition, parent's occupation, income/ wages, other physical property etc.

Preserving donor's help

I have my full gratitude towards the donors of Stichting along with Mr. Henk as without their support the School couldn't have reached to this level.

My next step would be motivating the community and making them aware that this School is not private but communal. It doesn't belong to any single individual but to the whole society and therefore, the development will only take effect after the true dedication and participation of people connected with School. "Fokland" community still hasn't heartily accepted that the School belongs to them and I will try my best to inspire them regarding this key matter.

Local fundraising and fundraising support to Stichting

I will keep continue the programs related to local fund raising and acknowledge to provide whatever news, data, stories, incidents etc. according to the requirement.

Boundary wall in front of School

The major aim of the construction of boundary around the school playground wall is to minimize the dropout of students, safeguard school's property and minimize the risk of encroachment of school's land in future days.

At the time of action, I will give a full support to build it, which is very helpful to School in future days.

Importance to sports

Sport for children is very essential as it makes children healthy and wise every time.

There are plenty of children in School who has special interest in different sports like; football, volley ball, cricket, indoor game etc. Firstly, I have planned to create boys and girls football team. The team can participate in school-wise football tournament where they can develop their skills in playing and on the other hand they can establish good relationship among the children of other Schools.

The jersey and football boot are another requirements for the School children after the formation of team.

Compulsory coaching classes

For the revision of curriculum chapter, School is planning to give extra one hour class (From 3.30 – 4.30) after School hour to the children and is making it mandatory for all.

Effort to quality education

The community (most of the parents) of Folkland basti, may be; because of bad impression or any other reason towards Dipendra School, are sending their children to “Jwaalamukhi” Secondary School, a government School, which is quite far from their location.

I am incredibly serious and distressed by this issue. People are sending their children far to other School, even they have School close to them, which is not a good symbol.

We are now lacking the teachers in School. Miss Sunita’s position was already filled by a qualified teacher. Mrs. Katuwal was selected as alternative teacher but still was not being able to pay.

Thus to enhance the quality of education, trained and skilled teacher are merely needed in School right now.

Hygiene and meal program preference

I have been immensely considered about the situation of hygienic environment in School which is commonly necessary and I have listed it out on top priority. I have planned to execute the awareness programs and drama show especially regarding the particular issue in coming days.

The meal program; its continuation is necessary for School. To make it more effective we will be operating it in advance manner and try to collect entire data and feedback

about it. Meal management committee is already formed which is team wise operating and controlling all regarding meal program.

Finally, last time during an informal contact with you, Mr. Henk, I was unable to provide you detail of information. And it had of course disappointed you. Please don't take it negatively and I actually didn't ignore you. By the way your contribution has been highly appreciated by everybody.

In coming days; I will of course try my best to drive this School to success and won't dissipate the effort of our valuable donors. In addition, I promise to supply the information whatever required from SHC/ SCHEDN.

I will try to activate above illustrated plans for its effective implementation.

I will keep update you and Mr. Saurav regarding every issues of Dipendra School in coming days.

Thank you
Yours sincerely,

Parvat Sanjel
