

## **Message from president (SHC)**

My name is Shyam Bahadur katuwal. I worked as a dedicated principal in government school for approximately 34 years taking responsibility of all my duties and now living as a retired employee.

In the period of serious insurgency and internal war in Nepal, the support of Dutch donation from Netherlands was received for the helpless and homeless children. Since the support was received in extremely difficult and insurgence period, it was admitted as fairly useful service.

I have been working with SHC in its chairmanship since 2005. We have obtained quite large amount of support from Dutch foundation till the date.

The internal war and insurgency has stopped in country however the complete reform and peace environment still hasn't have effect in country and the government hasn't entirely been responsible to orphan and helpless children.

Working with Dutch foundation, I think they are really very concerned and dependable with our working style and program. In the time of communication and cooperation they generally require transparency of our work with them and as far as possible we are also very conscious with the accountability and transparency of our work. We believe that we haven't misled the support received from them.

In context of progress, because of poor country, backward society and group, the expected outcome cannot be seen promptly. However the progress is comparatively enhanced and children are quite benefitted.

At the end, your support for the helpless and needy children of Nepal is very valuable and it worth. We are in high hope of continuation of support from that part of world.

Thank you heaps for your concern in Nepalese helpless children and your contribution is highly appreciated.

Mr. Shyam B Katuwal

President

Society for helpless children, Dharan
