

## The report of Deepa for the month of September 2019

Deepa appeared her terminal examination at the final week of this month by giving her more time in her study instead of playing. She is giving proper time to her study; her tutor told me that she needs good care and then she can improve her study. She regularly attends her school and also tuition classes. She also took her computer class regularly and she is in typing phase. She helps home mother and kitchen mother in and also helps small children in doing their homework. She is excited for coming festivals. She regularly takes bath and takes care of her personal basis.
