

MEETING AT DIPENDRA SCHOOL

(with some radiant people and few parents from same society)

Today's meeting at Dipendra School was very effective. School had called a meeting to discussed with some knowledgeable and educated people from society in subject of School's development and more importantly; the risk of School in near future as government has implementing soon the following condition that School should apply

i.e. 1st condition is class 1 – 8 and another condition is class 9 – 12.

Only these 2 categories of School will be authorized in near future. On the other side, if the number of children decreases to less than 60, School will be merged with another local School nearby.

Thus, the Dipendra School now has been facing high threats and its major focus is increasing the number of children in this new session by hook or by crook. Hence, the number of dynamic action plans and programs are considered necessary in school to anticipate positive result and to preserve a big asset of community in near future.

Mr. Katuwal said that this information and advices from us are delivering to School time to time and facility has been providing according to the proposal of school as well. But in return School was unable to grab the opportunity and couldn't implement the plan in proper way.

Mr. Katuwal directly focused and pointed out the reasons of ineffectual development is the low participation of community and some radiant people from same community as they are quite unaware and inactive. He added that for School, there are people from faraway country and other places, are concerned but extremely less people are concerned from the same community. The development of School is only possible with the full participation and communal thinking of people from the particular society.

The reasons of government not paying attention to the School is; very less effort of its inactive management committee, society itself. The success is possible, if communities makes an effort and highlight the School to district level and works with action plan and according to mission.

We discussed in lots of subjects regarding the development of School like; Nursery development, boundary wall development, parents seminar, data collection, children monitoring and evaluation, upgrade of classes, quality education, training of teachers, benefit of staffs etc etc.

Mr. Madan Dhakal also gave a speech and motivate people that development of School depends on the full participation of community and he promised to support School to minimize the problems. He said that he has taken step for the recommendation to bring government teacher in School in near future.

We are again planning to have another meeting especially to meet all parents from society.

Meeting ended with tea

16 January 2016, Saturday
