

## Bad situation of Duhabi

Nepal is in critical situation now. All most parties relating with Madheshi and Tharu have been doing strike for one month for securing their right in new constitution. They are striking against the government but government is not listening and showing interest to fulfilling their right on time. Without taking agreement from small parties, constitution of Nepal is going to declare on 2072/06/03 B.S. Madhesi and Tharu as well other community are raising their voice against the government. Its effect is bearing Nepalese people for one month. Due to long strike the people of all most part of Nepal are in trouble now. People can not performing their work smoothly. I think its effect is going on transport, industry, business, education, hospital as well other area.

People of Duhabi are suffering by strike highly because of dwelling place of Tharu community in this area. They are demanding separate province in their name including six districts of Terai. To make the government kneel down, they are showing procession around the market daily. That's why, market, schools, offices are completely closed. Sometime half shops are opened in the evening. Some goods are scares in market. Vegetable are found in high cost. Even people felt trouble getting medicine. I have not paid telephone and net charge because of office locked by movement. So Duhabi office has not internet facilities for 10 days till now. Time to time government has been proclaiming forbiddance area at certain place of Duhabi. So, we are feeling afraid. Sometime fighting has been occurring between police and movement. Daily procession is moved around the market. This news as well murdered news in war between police and movement has been making sad the children. They are asking, why this strike is becoming murderous?

Although we are trouble in Duhabi, we concentrated our attention towards children welfare. We strictly stop the children to go out. We are taking care properly. Now schools are closed. They have spare time too much. We know that in this period we should be responsible towards their study to fulfill their missing lesson as well keeping them busy to remove bore. So, I am adding tuition hour to support in study. I am involving them in creative activities like singing, dancing, Essay writing, drawing, story writing, and watching T.V. programme etc. I hope their missing study completing by additional tuition hour and their spare time is becoming useful doing extra activities. I have requested to another our tuition teacher being serious for higher classes, who is teaching Riju, Sapana, Devendra and Amrit now. He is positive with me.

Sometime we are feeling terrible because of open boundary wall. Children try to escape through it. We are motivating them to control from it. During this period children did not feel terrible in great matter without missing school. Urmila is smallest girl in Duhabi home. She showed wonderful activities three days ago .She prepared everything for school. Although she knew that the school is remaining close. She wore school dress and carried school bag. Her activities were showing that she was fond of going to school. After passing one month some schools are being opened with informal dress in morning time. We hope our life will be normal soon.
