

Deepa's report of June 2019

In this month, Deepa had a regular month as usual. She spent her time in studies, playing, helping home mothers and young children.

Deepa had no problem with her health. In spite of her negligence, she remained healthy and safe.

Regarding her educational updates, she took her tuition class with her hired tutor and computer class regularly. In study she has some problem i.e. getting difficult to memorize things. Although she regularly attends her school without being absent in her class sometimes she suffers some problems in memorizing. She is studying in class 8 but is very weak in her study. Also, she is giving her more time on study than playing. Her terminal exams are near and needs more focus on her study.

Likewise, talking about her cleanliness, Deepa regularly takes bath and washes her clothes. She is good and helpful girl to the younger ones. She loves to spend time and play with small children. She stays at home and helps the home mother playing a good role as family member at home.
