

Report of Rashmi Baraily

For the month of June 2019

Rashmi had frightened days this month as the spread of dengue fever was at a high growth. More than 500 people in Dharan suffered from this disease. But Rashmi is happy that she was not infected nor her family.

Regarding Rashmi's education, she is focusing more on science subject by giving more time in the evening after school as well. Other subjects seem normal for her.

She is having her first terminal examination on 2nd week of July. For that, she is preparing and is serious on revisions.

Due to some strong wind at night some weeks ago, Rashmi's electric wire had been cut down and they had no electricity. It was difficult for Rashmi to read and write in the evening.

Therefore, maintenance of electric wires has been done and right now, she is happy that she can give more time in her studies at night.

Rashmi is interested in saving some money daily Rs 10 so that she can reserve it for future. She wants to save it from her Tiffin expenses. If Rashmi saves Rs 10 daily from her Tiffin money, she will save Rs 250 per month.
